ANDES COIL PROCESSORS ADDS ADDITIONAL SLITTING CAPABILITY AND SPACE

GARY, Indiana (January 15, 2018) – Andes Coil Processors LLC announced that its Gary toll processing facility has increased its slitting capability with the installation of a third slitter. The 60-inch slitter is a fully refurbished Loopco slitter.

With the addition of the 60-inch slitter to the already existing 72- and 60-inch lines, Andes Coil Midwest expands the facility's ability to process material on three slitters running five shifts with capabilities between .011- and .1875-inch thickness; up to 72-inch wide master coils; and as narrow as .625-inches.

60-INCH LOOPCO SLITTER

COIL O.D.	N/A	MAX - 77"
INCOMING COIL I.D.	MIN - 20"	MAX - 24"
OUTGOING COIL I.D.	MIN - 20"	MAX - 24"
PROCESSED WIDTHS	MIN - .750"	MAX - 60.000"
MATERIAL THICKNESS	MIN - .011"	MAX - .100"
WEIGHT CAPACITY	MAX - 52,000 pounds in & 45,000 pounds out	

Andes Coil Processors also announces the addition of 19,000 square feet of storage and production space with a 25-ton overhead crane in its Gary production facility, providing storage capacity for an additional 12,000 tons of master coil.

ADD ONE – ANDES COIL PROCESSORS ADDS ADDITIONAL SLITTING CAPABILITY AND SPACE

“The original thought when opening the Gary facility in 2013 was to maintain one or two slitters,” said Lori Melvin, General Manager of the Andes Midwest facility. The demands of our loyal customers have provided us the opportunity and necessity to expand beyond that. We are growing and continue to do what we can to address our customers’ requests. It is exciting to watch the Gary location grow and make a name for Andes Coil Processors in the Midwest Region!”

This is another substantial move by Andes, as the company recently increased its slitting capability in North Texas at its Dallas facility in 2016. As a toll processor, Andes does not own steel but rather provides processing and logistical services to its customers.

About Andes Coil Processors LLC

Andes Coil Processors is a steel toll processing business that provides rail, warehousing, slitting, cut-to-length and trucking solutions to its customers. With three locations, Andes operates in the North Texas and Northern Indiana manufacturing hubs. The company has served the Texas region for 40 years.
