METAL RESOURCES HOLDINGS LLC APPOINTS NIKHIL AMIN AS CEO

Gary, Indiana (April 20, 2022) – The Board of Directors of Metal Resources Holdings LLC (MRHLLC) has confirmed Nikhil Amin as chief executive officer (CEO) of the holding company, MRHLLC, and its three businesses: Andes Coil Processors, MRI Steel Framing and Vulcan Material Testing, effective March 1, 2022.

Amin served at PrescientCo, LLC, for the past six years in the roles of chief operating officer and vice president of operations & supply chain. Prescient is a technology-driven design build company that designs, engineers, manufactures and installs multifamily housing up to 17 stories tall, built out of light-gauge steel.

Prior to Prescient, Amin was business unit president at Trinity Industries, Inc., in Dallas. His 30-plus years of experience includes leadership roles in operations, supply chain, finance and general management at United States Steel Corporation, Lone Star Steel, Steelcase and Pillsbury. Amin has an MBA in finance from the University of Minnesota.

“We believe Nikhil’s skills and experiences provide the platform and align perfectly with those capabilities required to lead our businesses forward and further enhance the distinctiveness and innovative dimensions of our brands in the marketplace,” said Lou Grabowsky, chairman of the board and managing director of Juniper Capital Management. “Beyond the technical and functional strengths, Nikhil brings us strong interpersonal skills, which complement those of our existing leadership and which we know are a critical ingredient to our culture. These skills manifest themselves in a collaborative, teaming, and caring approach. Nikhil is an empowering leader, establishing clear expectations and parameters while being results and solutions oriented.”

About Andes Coil Processors LLC

Andes Coil Processors is an independent steel coil toll processing business that provides rail, warehousing, slitting, cut-to-length (Texas locations only) and trucking solutions to its customers. With four locations, Andes operates in the North Texas and Northern Indiana manufacturing hubs. The company has served the Texas region for more than 35 years. More information is available at www.andescoil.com.

About MRI Steel Framing

Since 2004, MRI Steel Framing has been a leading manufacturer of heavy duty, traditional flat-steel framing components. MRI is an American-owned-and-operated company led by a management team with more than 40 years of combined industry knowledge and experience. Its entire line of cold-formed steel framing components is designed and manufactured by the finest team of professionals in the framing industry. Steel framing products include metal studs, standard track and slotted tracks. MRI also provides framing accessories such as resilient channel, furring channels, U-channels, angles, z-furring and flat stock. More information can be found at www.mristeel framing.com.

About Vulcan Material Testing

Vulcan Material Testing is a testing facility established by industry insiders to support companies that process and sell raw, mild steel. VMT provides fast and accurate results, enabling its customers to confidently provide critical data on the integrity of their steel to their customers. Vulcan's leadership has serviced the steel industry for more than 40 years in the heart of Northwest Indiana's steel manufacturing and production shoreline. More information can be found at www.VulcanMaterialTesting.com.
